

Task 6 – Shared Folder Structure

Document Code: HLUSTA8 **Company:** Ubuntu Innovations (Pty) Ltd **Prepared by:** Hlumelo **Date:** June 2026

Introduction

This document covers the shared folder layout I'm putting in place for Ubuntu Innovations. The idea is to give each department its own space on the file server while keeping sensitive stuff locked down. Everyone gets access to what they need — nothing more.

We have 25 staff spread across 5 departments, so the folder structure needs to be clean and easy to navigate.

Company Departments

Department	Staff Count
Executive Management	3
Finance	4
Human Resources	3
Sales and Marketing	7
Software Development	8

File Server Details

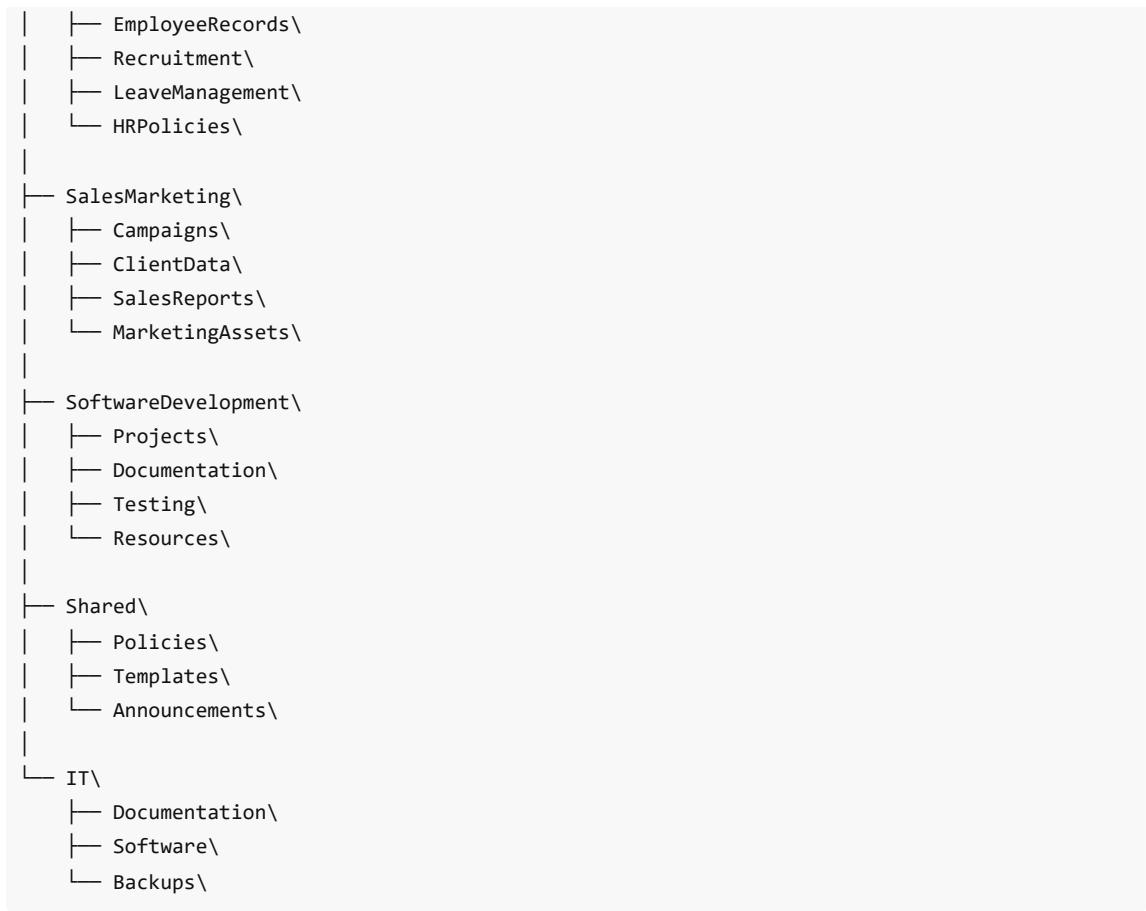

The company file server is named **FS01**. All shared folders live under:

```
\\FS01\CompanyShare\
```

Folder Layout

Here's the full structure I've set up:

```
\\FS01\CompanyShare\
|
├─ Executive\
|   ├─ BoardReports\
|   ├─ StrategicPlans\
|   └─ Contracts\
|
├─ Finance\
|   ├─ Budgets\
|   ├─ Invoices\
|   ├─ Payroll\
|   └─ Reports\
|
└─ HumanResources\
```

Folder Access Breakdown

Executive

- Only the 3 executive members can read or write here
- Stores board reports, contracts, and strategic plans
- No access for other departments

Finance

- Finance team has full read/write access
- Executives can read but not edit
- Payroll is stored here so access is kept very restricted

Human Resources

- HR staff have full access
- Executives can view but not modify
- Employee records and recruitment docs are kept here

Sales and Marketing

- Sales team has full read/write
- Executives can read
- Campaign files, client data, and marketing assets

Software Development

- Dev team has full access
- Executives can read
- Project files, documentation, and testing resources

Shared (Company-Wide)

- Every single staff member can read this
- Only managers and IT can add or change files
- Used for company policies, announcement and shared templates

IT

- IT staff only (plus exec read access)
- Stores network docs, software installers, and backup logs
- No access for general staff

Permissions Summary

Folder	All Staff	Exec	Finance	HR	Sales	Dev	IT
Executive		R/W					
Finance		R	R/W				
HumanResources		R		R/W			
SalesMarketing		R			R/W		
SoftwareDevelopment		R				R/W	
Shared	R	R/W	R/W	R/W	R/W	R/W	R/W
IT		R					R/W

R = Read only, R/W = Read and Write

Naming Rules

To keep things consistent I've set the following naming rules for all files and folders:

- No spaces — use PascalCase (e.g. SalesReports not Sales Reports)
 - No special characters like `/ \ : * ? " < > |`
 - Add version numbers where needed (e.g. Budget_v2.xlsx)
 - Use YYYY-MM-DD for dated files (e.g. Report_2026-06-01.pdf)
-

Who Manages This

The IT team is responsible for creating and updating folder structure and permissions. Any changes need to be approved by the relevant department manager first. Permissions should be reviewed every 6 months, and also any time someone joins or leaves the company.
