

Software Deployment Plan – Ubuntu Innovations

Moegammad Nur Johnston – The LAB RATS

- Purpose

This document will give you all steps for the deployment, updating and management of software for all 25 machines at Ubuntu. The Goal here is to maintain consistency, security and have legally compliant software usage at our company.

- Standard Software (ALL USERS)

Software	Purpose	Deployment Method	Update Frequency
Microsoft 365 Business Premium	Email, Word, Excel, PowerPoint	Cloud / Intune	Automatic (monthly)
Bitdefender Antivirus	Security and malware protection	Cloud push	Daily signature updates
Slack Pro	Internal communication	Intune / Direct download	Automatic
Zoom Business	Video conferencing	Intune / Direct download	Automatic
Google Chrome	Web browsing	Intune / Group Policy	Automatic
Mozilla Firefox	Web browsing (alternative)	Intune / Group Policy	Automatic

- Department Specific Software

Department	Software	Number of Licenses	Deployment Method
Finance	Sage Business Cloud Accounting	4	Cloud (vendor managed)
Human Resources	BambooHR	3	Cloud (vendor managed)
Sales & Marketing	HubSpot Sales Hub	7	Cloud (vendor managed)
Executive Management	Microsoft Project Online	3	Intune
Finance, Exec, HR	Adobe Acrobat Pro	10	Intune

- Development Team Software (8 user)

Software	Purpose	Responsible
Ubuntu Server 22.04 LTS	Operating system	IT Support
MySQL / PostgreSQL	Database for development	IT Support + Dev lead
GitLab CE	Local code repository mirror	IT Support
Docker Engine	Container hosting	IT Support + Dev lead

- Local Server Software

Software	License Type	Deployment Method	Responsible
Visual Studio Code	Free	Self-install	Developer
Git	Free	Self-install	Developer
Docker Desktop	Free	Self-install	Developer
Node.js	Free	Self-install	Developer
Python	Free	Self-install	Developer
MySQL Workbench	Free	Self-install	Developer
Postman	Free	Self-install	Developer

- Update Procedures

Software Category	Update Schedule	Responsible Party
Windows 11 operating system	Monthly (Patch Tuesday - second Tuesday of each month)	IT Support
Microsoft 365	Automatic (monthly)	Microsoft / IT Support
Bitdefender Antivirus	Daily (automatic)	Automatic
Department SaaS (Sage, BambooHR, HubSpot)	Vendor-managed (automatic)	Vendor
Development tools	Quarterly manual review	Development team lead
Critical security patches	Within 48 hours of release	IT Support
Local server (Ubuntu)	Weekly (Sundays at 2am)	IT Support (automated)

- New Employee Onboarding

Step	Action	Responsible
1	Create user account in Microsoft 365	IT Support
2	Assign software licenses (standard + department)	IT Support
3	Install computer (desktop or laptop)	IT Support
4	Verify antivirus is active	IT Support
5	Provide login credentials to employee	IT Support

- Employee Offboarding

Step	Action	Responsible
1	Revoke all software licenses	IT Support
2	Disable user account	IT Support
3	Backup user data (if needed)	IT Support + Manager
4	Wipe computer (if returning)	IT Support

- Licensing Compliance

Activity	Frequency	Responsible
License audit (active vs. assigned)	Quarterly (Jan, Apr, Jul, Oct)	IT Support
Renewal of annual subscriptions	30 days before expiry	IT Support + Finance
Removal of unused licenses	Monthly	IT Support

- Total Annual Software Cost

Category	Annual Cost (ZAR)
Standard software (25 users)	R 102,000
Department-specific software	R 29,500
Development tools (free)	R 0
Local server software (open source)	R 0

- Responsible Parties

Role	Person / Department	Responsibilities
IT Support	[IT Support Person Name]	Software deployment, updates, licenses, onboarding/offboarding
Development Team Lead	[Lead Developer Name]	Development tool management, local server oversight
Finance Manager	[Finance Manager Name]	Software budget approval, renewal payments
